

SUNTEC offers a brand new range of products, based on its gear pump experience.

We are pleased to present you the **SUNTEC Fuel Transfer Units** (electrical motor, hydraulic pump, measuring instruments and equipment assemblies).

These units could be used in various applications, among these :

- transfer loop (when the storage tank is distant to the burner)
- delivery oil from the tank to one or more burner.

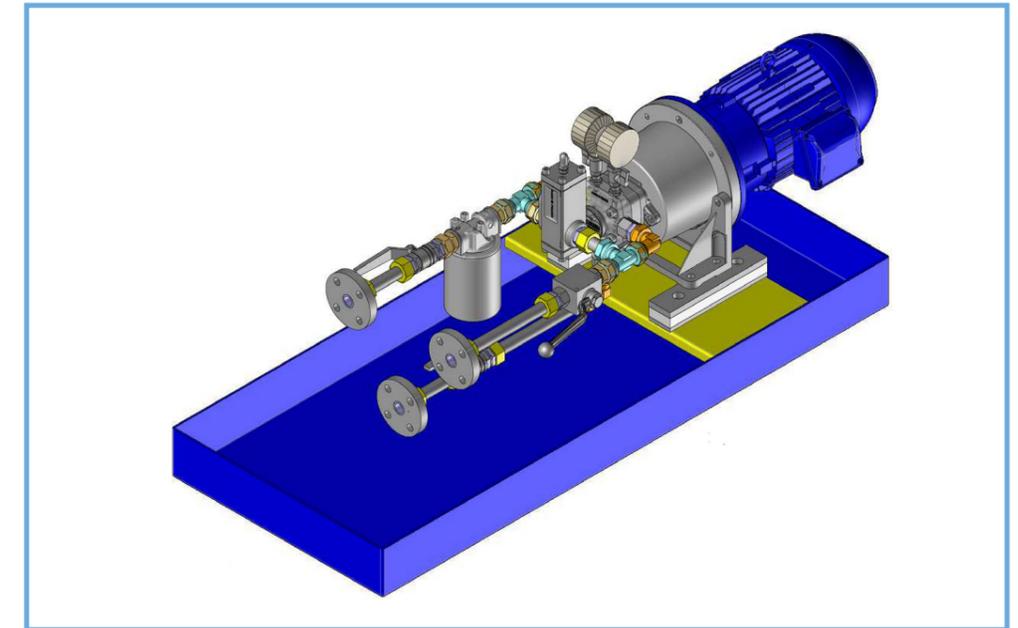

They are available from 100 to 1000 GpH and able to pump up to 15'.

They will fit all types of fuels, from kerosene to fuel oil #6 and including biofuels.

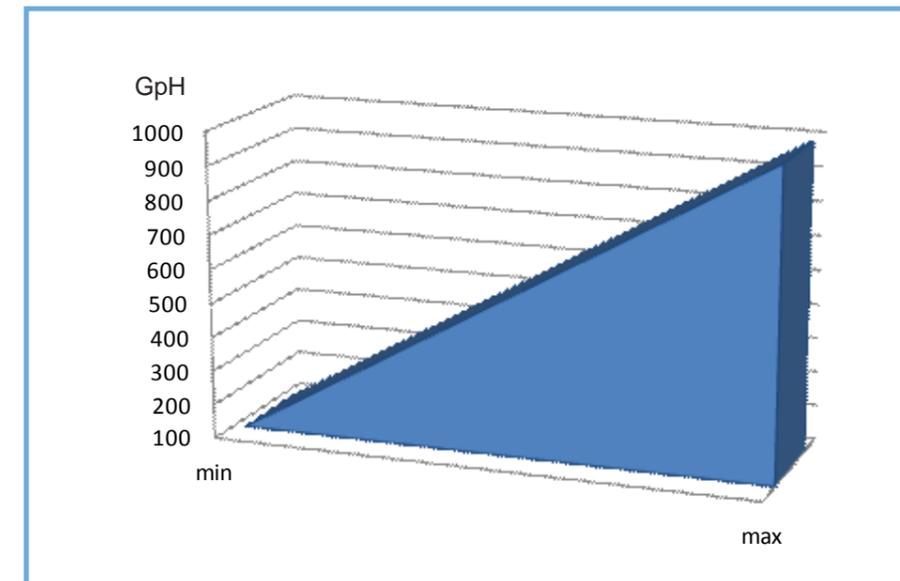

These Fuel Transfer Units are designed according to your needs - select the different elements and applications : motor, fuel, pressure, installation settings, adaptor and accessories; and we will answer to your request.

We are available to answer all your demands.

Please do not hesitate to contact us: info@suntecpumps.com
