

INFORMATION N° 105

Additional marking SUNTEC products

Some pumps and valves may have an additional date code marking (date of manufacturing). These are products that have not been shipped immediately after their manufacturing. This new marking defines a new date of the warranty period.

This new marking (year / month : YYMM) on the back face of the pump (hub side) is always preceded by the symbol (S) ex:

(S)1406 (pump marked in June 2014)
