- Data corresponding to installation system (one or two-pipe), to solenoid voltage, to connector length are not stamped on the pump because these parameters could be modified according to the installation.
- *Les données correspondant à la configuration de l'installation (monotube ou bitube), à la tension de la bobine et à la longueur du connecteur ne sont pas gravées sur la pompe car ces paramètres peuvent être modifiés lors de la mise en service.*
- *Angaben über Installation (1- oder 2-strang) und Ausführung Spule und Kabellänge fehlen, da diese nachträglich umgestellt werden können.*
- *I dati sulla configurazione monotubo o bitubo, la tensione della bobina, la lunghezza del connettore non sono indicati sulla pompa perché questi dati possono essere modificati dall'installatore.*
